THE Sanitary Board at its meeting on Thursday had under discussion the expediency of flushing the drains with sea water. The smells arising from the drains are Works Department and in no way concerned the Sanitary Board, and in the course of the conversation made the remark, "Oh, if you "pay attention to public opinion you will "have your bands full." The Colonial Surgeon forthwith impugned Mr. RENNIE's veracity, said he did not believe that Mr. Coopen ever said anything of the kind, and that a subordinate had no right to put such remarks on a circulating letter to We see no reason, however, to doubt - the correctness of Mr. RENNIE'S version of the conversation, for the contemptuous remark about public opinion. just such a one as Mr. Coorse might be expected to make in private conversation. though no doubt he would have kept s better guard on his tongue had he thought his words were to be made public. Whether long since the Punjom Company, which Mr. Rennie was justified in repeating the conversation in an official document is did but it was saved by the shareholders coming personal knowledge of the matter. Leaving the allow their rights to the property to lapse. personal question, however, we come to the vastly more important one of the state of the drains. The smells complained of arise from the storm water drains, which ought always to be clean and sweet without requiring flushing. The Acting Director of Public Works says the real remedy is to push on with the re-drainage of houses, connects exequator, empowering Mr. W. F. Hunt to wing the new branch drains to the main sewers. That is, sawage ought not to be allowed to find its way into the storm water drains. The question naturally suggests itself why the Australians should have parted with the property, if it is what it is represented, to a Hongkong Company. The explanation seems to be that on the working out of the first levels mismangement prevailed and the property changed hands until it ultimately was disposed of by the then owners on the Hongkong market. It is still awaiting further development and it is for Hongkong to say whether this aball be carried out by Hongkong capital or whether the present rights shall be allowed to lapse. as they will do in May next unless the mine is being worked by that time. > The suggested removal of the import duty on raw-cotton in Japan does not meet with unqualified approval. From the Japan Mail we learn that a meeting of the opponents of the measure. which seems to have the support of the majority of both houses of the Diet, was held in the Hall of the Society of Agriculture; Akasaka, Tokyo, on the evening of the 2nd inst. Mr. Oshima, of the Niroku Shimbun, told the meeting that the proposals thortly to be laid before the Diet made t advisable for all those who were opposed to the selves. Hitherto they had always been conscious of one week point in their contention. It had been a matter of doubt whether foreign cotton would thrive on Japanese soil. But he was glad to say that this doubt was now set at rest. It had been abandantly proved that the exotic varieties of cotton did well in this country. Oshikawa and others, then gave details of successful experiments in cotton growing which had recently been made in various parts of Japan, after which Mr. Osbima reminded the meeting that as this Bill would probably come before the House during its present session though it might be postponed to the next, would be advisable to form an association of persom interested in the subject, and to rouse public opinion against the measure. This suggestion meeting with unanimous approbation. Mr. Oshima and one other were appointed dram up a scheme for the projected association, and were requested to sum mon another meeting so soon as their draft scheme should be read

Mr. Draper obtained it from some friends and placed it round the house or enclosed a piece of ground with it It does not appear from the evidence whether was so fixed into the ground as to become a fixture. Barns, granaries, sheds, and mills under various circumstances been held not to be fixtures, for it is necessary to constitute a fixture that the subject matter should be let into or united to the land or some substance previously connected, with the land. The letter of the plaintiff above quoted nows in my opinion that he had allowed Draper on leaving the house to dispose of such things as he had placed there, otherwise all piotures left by him would have become the property of the landlord; and I find that Mr. Draper accordingly gave the fowl-house to the defendant. Under these circumstances the defendant had the right to remove it. With respect to the jiuricksha which is mi-sing, the plaintiff says in his evidence, "the jinrickshi was there when I let the place to Mr. Jackson, but it is now missing. I saw the ricksha a few months ago, in July or September. It was in the passage leading from the out-house to the premises. The ricksba I value at \$10. Three or four years ugo I paid 222 for it." The witnesses called by the plaintiff bave not made any mention of the jinrickshe, its value or conditi Defendant says he found a jinricksha there which he put in a corner of the garden. tiff's counsel contended that defendant had right to put the jinricksha in the garden exposed entitled to claim damages for the injuries thus done to his 'r. )keha, but plaintiff's claim is not one for damage done to the jinricksha, nor has he proved any, but he claims what he considers to be the full value of the jinrioksha, which he may is missing, that is, which defendant has removed or takenaway. I am of opinion that he has not proved that defendant has taken away this jinclokshe and he has not given any evidence to prove what,

(Hear, hear.) All cases which come to office or shop should be passed on, as much as possible,

to the Society. This, it is true, would put into the hands of the Committee still more work, but they have performed the work so well in past years and the organisation is so complete that the undertaking of a few more cases would source of satisfaction to the Committee It is discovered sometimes that cases come before further help is refused the Society takes them up and discovers their real needs, and, as a last resource, either gets them away from the Colony or supplies that relief which should have been given at an earlier stage of the case. If the community, instead of banding over the counter same of money to persons who often sperd it most unworthily, would contribute the smesume of money to the Society, it would be spent to better purpose and would go farther. It must not be overlooked that this Society is placed in a most peculiar position. It has to perform the functions of relieving officer and Board of Guardians, and, shall I say, a Government official in many cases. (Hear, bear,) There are Acts supposed to prevent vagrancy and the coming into the Colony of worthless persons. These Acts are practically a dead letter. They do not work; and what should fall upon the shoulders of the Attorney-General or Chief of Police or some make a liberal grant, a sort of Poor Fund grant, such as was accessible for private charities some years ago and which was applied for special relief in special cases. I think if a sum of \$500 were handed over to this Society it would be carefully administered in cases for which the Government, in some respects, are responsible There are prisoners released from gaol and coat penniless, without characters on the Colony Some have been taken up by the Society and dealt with satisfactorily. Others are allowed to drift about, month after month, until they are declared destitute before the Magistrate and then they have been sent away in a few cases. The ands of the Society, I am glad to see, are still satisfactory. But the Committee have not risen to that heroic point to which I have once or twice urged them, of ending the year with the balance on the wrong side, and instead of doling out a few cents at a time to deal out their funds with the large bearted liberality which some cases deserve. There are times when you feel the bestowal of a few cents is too much, but there are cases that are very urgent and the Society would be very wise to deal more liberally with these cases when they come before them. Polly Thompson, generally supposed to be the Queen's oldest subject, died recently at the Camberwell workhouse in her 107th year. She had been obliged to take to her bed during the past three weeks, and gradually sank. She attained her 107th birthday last June, and was then the recipient of letters from the Queen, the Prince of Wales, and the Duchess of York. In spite of her great age. Thompson, who had never married, retained her faculties, and was accustomed to chat pleasantly with visitors concerning events which occurred in her younger days. It has been suggested that, if sufficient funds are forthcoming, Thompson should be buried privately

instead of by the parish. BHIPPING REPORTS: The Brilish steamer Liensking, from Wuhu 18th Dec., had moderate monsoon and fine wea-

FIHE object of the Company is to form and maintain a Factory in Yokohama for the Manufacture of Watches of all kinds and de-

HONGKONG AND YOKOHAMA

For this purpose it is proposed to purchase a site within the limits of the Foreign Settlement of Yokohama and thereon to erect the Factory.

The founders of the Company are possessed of a plant of machinery complete in every particular, of the newest design and the finest workmanship, and adapted for the making of all implements used in the watch trade, as well as the making of watches. It is well known that machinery has effected a complete revolution in the watch trade, and it is confidently expected that by availing itself of the comparatively cheap labour of this country this Company will RESERVE FUND ...... 825,000 be able to supply the trade in all parts of the CLAIMS PAID. ..... 954,000. world with an article which for excellence of workmanship and cheapness of price will defy

competition. Mr. P. H. Whoeler, the Superintendent of the Company, has been for many years engaged in developing watch making muchinery, and the testimonials from his former employers testify to his business ability, skill, and intogrity. The machinery of which the founders, are possessed has been perfected under his superintendence, and a considerable part thereof is of his invention.

Besides the machinery the founders are possess ed of ten thousand watches in various stages o completion which are the out-turn of the said machinery, and material on hand sufficient to turn out about twenty five thousand more. I will thus be seen that it is not an untried plant which the founders have acquired, but one which has already given proof of its excellence. It was only the advantage of obtaining a cheaper labour market than can be found in the United States that has induced them to work the business in

It is an established fact that the principal factories in the United States in seven years paid 300 per cent. dividend on a capital of Sir Million Dollars; and that was done on a wage basis of \$1.50 (gold) per operative, the factories employing six thousand hands. If the difference in the rate of labour in this country is taken into consideration the operations of the Company will be assured to realize to the full the expectations of the founders. The profits of watch making

are based entirely on the price of labour. It is not in the labour market only that an advantage will be obtained. Coal and other First Order of Merit, materials can be purchased in this country at a lower rate than in the United States. And besides all these advantages, which are great there is one of still greater importance, the knowledge to be obtained of the requirements of the local trade, of the trade for Chica, and that of "The Straits" and India. The Company will be capable of supplying a watch of the best workmanship to the population of these large and important countries at a price for below any watch of like character that has ever been offered

to these markets. the founders confidently expect to pay a dividend. of at least 10 per cent. per annum on the first | Cargo and Passongers there. 

The Company has been registered in Hong. DOROTHY'S DOUBLE kong as a Limited Company.

The founders take and acquire 30,000 shares of the stock of the Company in payment for the machinery, plant, and stock and their labour and experience in preparing and procuring the machinery and stock. Ten thousand shares of twenty five yen each

are offered for subscription. The memorandum and articles of association. of the Company may be inspected at the offices of the Company, No. 10, Bund, Yokohama.
